

Creative Information Technology, Inc. (CITI) services under Chief of Naval Operations (CNO) SeaPort-Enhanced (SeaPort-e)

In 2002, the Chief of Naval Operations (CNO) promulgated Seapower 21 to provide a framework for aligning, organizing, and integrating the U.S. Navy to meet a wide variety of challenges. The CNO called upon the entire Navy to find ways to become more efficient and effective. To meet Seapower 21 objectives and to increase efficiency, the NAVSEA Warfare Centers established the Seaport Enhanced (Seaport-e) Multiple Award Contract (MAC) vehicle, using a web-based, e-business procurement portal to facilitate performance-based service acquisition, leverage buying power, improve business intelligence, and reduce cycle time.

FEATURES & BENEFITS

SeaPort-e makes electronic procurement of engineering, technical, and programmatic support services at NAVSEA a reality. The Navy Virtual SYSCOM (VS) Commanders have designated SeaPort-e as the vehicle of choice for engineering, financial, and program management contractor support services.

Navy activities making use of the SeaPort-e contract vehicle include the Naval Sea Systems Command, Naval Air Systems Command, Space and Naval Warfare Systems Command, Naval Supply Systems Command, Military Sealift Command, Naval Facilities Command, Strategic Systems Programs, and the United States Marine Corps. This contract may also be used to support other Department of Defense, non-DoD, or Joint agencies for work integrally related to product areas and missions.

- Five-year base with two five-year options for a total of 15 years
- Task orders completed in the zone corresponding to the primary place of performance
- Cost and fixed price task orders permitted
