Chronic Care Management

Add $250,000 per provider to your bottom line!

Increase your revenue potential without compromising patient health!
Take advantage of the CMS code 99490 and get reimbursed between $42-87 per patient, per month for Chronic Care Management services, while improving the health of your patients. This can translate to $504,000 of additional profit to your practice.*

CMS’s Chronic Care Management (CCM) initiative is designed to pay physicians for non-face-to-face care coordination services furnished to Medicare beneficiaries with multiple chronic conditions. For many healthcare organizations the option of filling is not feasible due intricate billing regulations, additional investment in technology and staff.

Chronic Care Management for increased patient engagement
Chronic Care Management (CCM) by CITI Healthcare is a web-based tool that combines technology, clinical services, analytics, and exceptional customer service to achieve the result of increased patient interaction between office visits. CCM maximizes patient enrollment, increases patient compliance, documents CCM requirements, and minimizes additional workload.

CCM is designed to engage healthcare systems, payers, and employers beyond low acuity virtual visits, using both platform and service capability to perform extraordinary care coordination and increase profitability.

The CCM tool is positioned to take on adherence, compliance, and risk mitigation in chronic disease, using a multi-pronged approach.

Our CCM approach includes:
Predictive modeling
Patient engagement and messaging for adherence
Management of transitions in care
Remote patient monitoring
Focus on index admission and readmissions

Advantages

Ideal Life Remote Patient Monitoring Devices
EMR Connect: Secure, Compliant Access to Active Patient Data in EMRs, including Epic, Cerner, Allscripts, AthenaHealth, Eclinicalworks
EMR Connect Network – HITRUST certified transaction network for web services, HL7, ANSI X12 communications to/from healthcare entities
Professional Services for Customer Success

* Medicare patients with 2+MCC Xx$42x12 months
Chronic Diseases & Medicare
According to the Center for Disease Control (CDC), chronic diseases and conditions—such as heart disease, stroke, cancer, diabetes, obesity, and arthritis—are among the most common, costly, and preventable of all health problems. As of 2012, about half of all adults - 117 million people – had one or more chronic health conditions (MCC), accounting for 86% of all healthcare spending.

Over two-thirds of Medicare beneficiaries in traditional Medicare, have two or more chronic conditions and about 1 in 7 (14%) have 6 or more. Accounting for disproportionate amount of the 300 Billion spent annually in Medicare.
