

# Comprehensive ACO Data Services

Accountable Care Organizations require access to patient data across the continuum of care spanning inpatient and outpatient settings. Frequently this data exists in silos and is hard to access. CITI can help aggregate healthcare data, analyze trends, and improve the quality of accountable care.

## CITI HEALTHCARE SERVICES

### DATA SERVICES

- Identity and Access Management
- Cloud Computing
- MS SharePoint Services

### MANAGED SERVICES

- Full Application Lifecycle Management
- Business Intelligence
- Staff Augmentation
- Custom Software Development
- Health IT Consultancy

## TECHNOLOGY ENABLES TRANSFORMATION

CITI Healthcare's suite of solutions and services can help you transform your business by reducing costs, and increasing patient satisfaction through a coordinated healthcare delivery system. We can help you ensure that patients get the right care at the right time, while preventing duplication of services and medical errors.

### Mitigating ACO challenges

Most ACOs are reluctant to invest heavily on Information Technology initially and prefer to operate with a very high level of efficiency. CITI's staff augmentation services, technology solutions, and full managed services can help you reduce your time spent on data management issues so that you can focus on care coordination and the quality of care delivery instead.

CITI is recognized in the industry as a company providing expertise in healthcare data management. Built off our experience with extracting data from over 300 unique systems/applications for data archiving, we have developed a suite of healthcare solutions for data extraction, data transformation, data aggregation, business rule management, data ingestion, data warehousing, and predictive analytics - that can help you boost profitability and savings.

## HARNESS THE POWER OF ANALYTICS

We can help you build a customized enterprise data warehouse and prescriptive analytics solution that can help you improve operational efficiency, optimize infrastructure investments, and adjust care delivery models for high-risk patients - putting you on the path to become a high-performing ACO.

-  Create easy-to-understand reports, alerts, and dashboards
-  Conduct trend and gap analyses to improve resource utilization and quality measures
-  Leverage and customize advanced business rules engines for risk segmentation
-  Reduce readmission costs and penalties using predictive modeling

## SUCCESS AREAS

- 1 Significantly improves key operational efficiencies such as quality reporting and performance improvement.
- 2 Improves ability to efficiently respond to queries from different stakeholders such as payers, hospitals and other providers.
- 3 Enhances the quality of care of the patients, which can, in-turn, help the ACOs contribute towards cost savings.
- 4 Improve the collection through reporting and common denial reasons.
- 5 Built-in dashboards and analytics help practice administrators take key decisions at the point-of-care.

## WHY CITI HEALTHCARE

CITI offers a full portfolio of IT products and services for government and commercial customers. Our offices include a state-of-the-art development integration lab and testing facility, where we both develop systems and explore advanced technologies on behalf of our customers. CITI has proven itself an IT thought leader in the core competencies of systems engineering and integration; network engineering; identity management/biometrics; healthcare; business intelligence/data warehousing; enterprise collaboration portals; and enterprise architecture. CITI has successfully architected, designed, developed, and implemented agile, innovative, and on-time solutions such as custom software applications and critical systems for our customers in over 240 locations worldwide.

### Impact of Health Infrastructure on ACO Focus

Most ACOs focus their attention on preventive care, coordinating care, eliminating readmissions, and monitoring and improving their quality and performance measures. CITI can assist you with your initial and on-going data management needs allowing you to invest where needed for your market.

CITI Healthcare's suite of technology solutions and staff augmentation services can help you find the right balance between patient experience and profitability.
